3. Complexity levels:

Eg. Using your card to pay Utility Bills

REWARDS CARD

|                      |         |
|----------------------|---------|
| Annual Utility Spend | ₹60,000 |
| Points/150           | 2       |
| Total points earned  | 800     |
| Charges per year     | Nil*    |

Total Savings ₹800

CASH BACK CARD\*\*

|                        |         |
|------------------------|---------|
| Annual Utility Spend   | ₹60,000 |
| Cash back              | 5%      |
| Total cash back earned | ₹3,000  |
| Charges per year       | ₹499    |

Total Savings ₹2,499

\*For online applications

Cashback cards are pretty straightforward; you get cashback on certain expenditures. No headache of collecting points and redeeming them. However, with some reward point cards, you can get great deals for certain spending or redemptions, getting as high as a 25% reward rate! This means getting the benefits of ₹25 on spending ₹100! However, you need to properly research these deals, plan your spending, collect your points and plan to redeem them. Also, these deals are dynamic, so you need to keep updating your research constantly or else you might lose out on them!

So ideally, if you are a beginner or don't want the hassle or reward points, you can go for cashback cards.

Eg. Using your card to pay for fuel

REWARDS CARD

|                      |         |
|----------------------|---------|
| Annual Utility Spend | ₹60,000 |
| Points/150           | 5       |
| Total points earned  | 2000    |
| Charges per year     | Nil*    |

Total Savings ₹2,000

CASH BACK CARD\*\*

|                        |         |
|------------------------|---------|
| Annual Utility Spend   | ₹60,000 |
| Cash back              | 2.5%    |
| Total cash back earned | ₹1,500  |
| Charges per year       | ₹499    |

Total Savings ₹1,001
