

Step 5**At the time of Discharge**

When you're getting discharged, request an itemized bill and verify each line item.

The Bill should show these:

- ✓ List of the dates you received each medical service,
- ✓ Descriptions of the services,
- ✓ Full price of the services or supplies you received before insurance has been factored in.
- ✓ The total amount charged directly to either you or your insurance provider.
- ✓ The amount the healthcare provider has agreed not to charge.
- ✓ The amount of your health insurance provider has approved.
- ✓ The amount you are responsible to pay, if any.

You will also have to pay for certain medical expenses that are over your policy cover limits. As the insurance company pays the hospital directly, the insurance company retains all the original documents pertaining to your hospitalization. So, request a copy of the same for your records.
