

1. Recording your transactions

Bank and Credit Card Statements

- Start by downloading your bank and credit card statements. Get them for each month you want to track.

Open the Excel sheet I've provided. There should be a "Records" sheet. In this sheet, you will need to fill in details about all your transactions, the withdrawal amount, and deposits.

Jan	Investments	RD	₹100
Jan	Investments	SIPs	₹100

Now, take a closer look at each transaction. Classify them based on what you spent money on. Was it groceries, rent, eating out, or something else? Assign each transaction to the correct category. This breakdown will give you a clear picture of where your money is going.

Tip: Do this weekly to ensure you remember the transactions.
