

About Familius

Welcome to a place where mothers are celebrated, not compared. Where heart is at the center of our families, and family at the center of our homes. Where boo boos are still kissed, cake beaters are still licked, and mistakes are still okay. Welcome to a place where books—and family—are beautiful. Familius: a book publisher dedicated to helping families be happy.

Familius was founded in 2012 with the intent to align the founders' love of publishing and family with the digital publishing renaissance which occurred simultaneously with the Great Recession. The founders believe that the traditional family is the basic unit of society, and that a society is only as strong as the families that create it. Familius's mission is to help families be happy. We invite you to participate with us in strengthening your family by being part of the Familius family. Go to www.familius.com to subscribe and receive information about our books, articles, and videos.
