Chris and Jack have written our generation's *A Random Walk Down Wall Street*. This book is required reading for anyone looking to get involved with and profit from the cryptoassets boom.

Chris and Jack have been fellow travelers in the blockchain space since way before it was a polite cocktail party topic. Over the years, we've laughed and marveled together at how the space has evolved. This book could not be more timely in describing an emerging \$100+ billion financial market and all of the chaos and promise it brings. The authors capture not only the technical and market analysis you need to know to invest in these projects but also the ethos and excitement of the people pushing the envelope. Savor this book. It's a time-capsule view of the birth of an amazing technology.
