

—FRANCOIS GADENNE, chairman and
executive director of the Retirement
Income Industry Association

The most complete and informational piece of literature on the subject today. Chris Burniske and Jack Tatar steer the reader through a torrent of unknowns, illuminating the complicated world of cryptoassets and their underlying technology, which will more than likely become our generation's most important innovation.

—RYAN LANCELOT, coauthor of *What's
the Deal with Bitcoins?*

A must-read to appreciate the Bitcoin network effect and the wave of innovation that it launched through the community of people who played critical roles in creating all the distributed ecosystems that are transforming business models.

—CRISTINA DOLAN, cofounder and
COO of InsureX

Crypto trading and the FinTech innovations unlocked by blockchains will do to Wall Street what personal Internet publishing and blogging did to media empires. This power shift is inevitable. Capital allocation no longer needs to be managed by powerful institutions which have proven to be corrupt and reckless. Regulation and regulatory capture is putting the U.S. at risk of losing out in the transition. Chris Burniske and Jack Tatar give you, the individual, the tools to evaluate these new cryptoassets and take advantage of what I
