

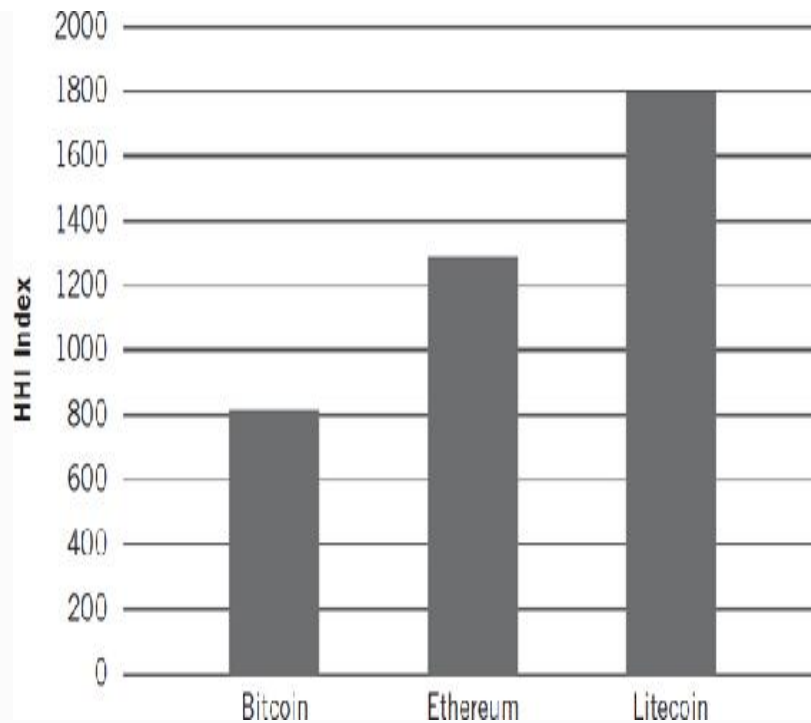

Figure 13.6 ■ The health of Bitcoin, Ethereum, and Litecoin’s mining ecosystems based on the HHI

Data sourced from Etherscan.io, litecoinpool.org, and Blockchain.info

The centralization of miners in different blockchain networks varies over time depending on how much growth the cryptoasset experiences and the evolution of the compute infrastructure to support it. For example, [Figure 13.7](#) is a graph of Bitcoin’s HHI index over time.
