

technical indicators, social media stats, developer activity, and more.

Education: <https://www.coursera.org/learn/cryptocurrency>

There are a growing number of quality courses available online that provide a deep understanding of bitcoin and cryptoassets. One of our favorites is the “Bitcoin and Cryptocurrency Technologies” course provided by Princeton University via Coursera.

Etherscan: <https://etherscan.io/charts>

The best place for charts and easily downloadable CSV files of Ethereum network statistics, as well as insight into the cryptotokens operating on top of Ethereum.

Exchange War: <https://exchangewar.info/>

An all-encompassing website to track the activity of different cryptoasset exchanges globally and their respective share in different trading pairs.

Google Alerts: <https://www.google.com/alerts>

To keep abreast of the latest news around bitcoin and cryptoassets, use the Google Alerts function to get an e-mail (usually daily) listing the latest news stories around your favorite keywords.

Smith + Crown: <https://www.smithandcrown.com/>

The most complete website for all things ICO, including past, present, and future sales, with a fair amount of research interspersed throughout the site.
