

[Table 7.7](#) ROBUST Performance (1/1976–12/2014)

MA RULE	SPX	EAFE	REIT	GSCI	LTR
CAGR	11.71%	10.21%	14.18%	8.34%	8.82%
Standard Deviation	11.61%	11.71%	11.85%	14.74%	6.22%
Downside Deviation	9.20%	8.72%	9.08%	11.25%	4.07%
Sharpe Ratio	0.60	0.48	0.78	0.29	0.62
Sortino Ratio (MAR = 5%)	0.74	0.62	1.00	0.37	0.90
Worst Drawdown	−26.30%	−19.28%	−18.30%	−51.47%	−6.41%
Worst Month Return	−21.58%	−14.01%	−15.24%	−14.41%	−5.71%
Best Month Return	13.52%	14.06%	12.60%	22.94%	8.73%
Profitable Months	72.01%	71.58%	72.44%	72.01%	72.65%

ROBUST performance is strong across the five asset classes. [Table 7.8](#) conducts the head-to-head analysis between TMOM, MA, and ROBUST. While there is certainly an element of “splitting hairs” across the models (they are all a lot better than buy and hold), the evidence suggests that combining the two technical rules seems to be the strongest performer.³
