Do you have money sitting in the bank or buried in the backyard for that “rainy day”? Well, it’s raining. If you have a debt that is in collection, or if you have a high balance to pay down, go ahead and use the money now to get out of this mess. Unless you are earning huge interest on it, you are better off to pay some of these problem areas and make them go away!

Some people are afraid to dip into that “emergency” fund, but it is only paying 4% or some low interest! Your credit cards are costing you way more than that. And if you can clean up your credit report quickly, you will be on your way to wealth creation. You won’t need to dig a hole in the backyard because you won’t have the money fear and debt worries hanging over you any more! Take care of this problem and the future can take care of itself.

Maybe you don’t have any savings that you can use. It is still critical for you to pay off these problem credit items. You need to get the money. Borrow it! I see your eyes fly wide open. We’re talking about paying off debt, and I tell you to borrow more debt? Yes! Borrow money from friends and family to pay down the problem items on the credit report. What goes on with you and your family and friends is private – it won’t show up on a credit report. Most people you know would probably charge you lower interest than a bank, or if you are really lucky, no interest at all!

When you do these methods to pump up your credit score, make sure that the credit report does indeed reflect your hard work. If there was an item that was not yours, or you pay off a debt that was in collection, or you pay down your debts, be sure that the report indicates what you have accomplished. The whole point of doing the work is to get the credit score improved!

If your fixes do not show up, then contact the credit reporting agencies. They may let you just send in your proof of payment instead of having to go through the dispute route with them. Do what you have to do to make sure what you have fixed shows up as fixed!
