

It took two years for this poor woman's bank account to get unfrozen. She was confused and fearful, and as she said, she felt helpless. That is why you need to arm yourself with the knowledge in this book so that you won't feel confused or afraid, and you are never, ever, helpless. Monitor your credit report regularly and always review each monthly credit card statement. If something does not make sense, call the credit card company.

Stop the Hound Dogs

Debt collectors may hound you at first, but you can nip them in the bud and stop them dead in their tracks. In 24 hours, you can take a situation that had you feeling despair to a state of repair. The creditors and debt collectors listen when the numbers speak. If the numbers on your balance sheet and income statement are screaming, "I have nothing," the collector will realize it is futile to keep with the scare tactics. They will become much more sensible in their dealings with you.

When you were a kid and wanted to borrow a dollar from your brother, and he said he didn't have it, maybe you didn't believe him at first. You kept asking him and bugging him relentlessly. He insisted that he was broke. Then you checked his piggy bank and his wallet – the one that he didn't know you knew where he hid it – and you saw that they both were indeed empty. You finally understood that he honestly did not have a dollar to give you. So what did you do? You left him alone.

Debt reduction methods are easy. You have every right to take full advantage of these solutions. They know it. That's why the banks and the credit card companies don't want this book in circulation. The consumer lending industry would most certainly prefer that I keep all their tactics to myself. Sorry, fellas, ain't gonna happen.

Enough is enough. If they would be satisfied with healthy profits and return to fair lending practices, I would shut up. If they continue to keep up with the outrageous methods of pinching every last penny out of the American citizen, then I will continue to expose them for what they are.

An obnoxious greedy industry should be shown for what it is. If they decide to change their ways, I'll be the first to applaud.
