

could get instant credit with the use of the “piggy back” method! I wrote: “Yesterday, your credit report was causing you to worry. Today, you are taking the steps to up that credit score; and TODAY, you can immediately have credit!” I had no idea that I would have to say, “Tomorrow this great method will be taken away!” I know things change fast, but the timing of this FICO scoring change is exasperating and infuriating to say the least. The ink was barely dry on the first printing of the book when the big wigs came up with their big idea.

Co-Sign = Instant Cash and Instant Credit for You!

Co-signing a loan is an excellent retaliation to the demise of the piggyback method. If your spouse was an authorized user on your credit card, put him/her as a joint account holder. Try to do this as well for your mother and your college student or your friend, if the credit card company will allow it. The piggyback method may have been taken away, but co-signing accomplishes the same purpose. This method is just as easy and just as quick, and the sky is the limit when it comes to dollar signs.

Thought you would never be able to get a loan with the state of your credit report at the moment? Think again! If you need \$10,000 cash right now, you can get it! Virtually overnight!

You can get a loan, and you can have \$500, \$1000, \$5000, or even \$10,000 in your hands in cash! Never forget that your bad credit report is a temporary condition. While you are mending it, you do not have to be stopped dead in your tracks. There are ways to get instant cash, and this is a fabulous way to do it! That trusted friend or family member who would let you piggyback off their credit card can co-sign a loan for you, and help you on your way to creating wealth and a sense of financial freedom. They – the banks – have not put the kibosh on co-signing for loans!

One slight word of caution, which you already know: You only want to co-sign with a person who is responsible and has a good credit history. When you co-sign with someone, you share the debt. If one does not pay, the other is responsible for it. This has more risk than simply being added to a credit card. There is actual money being received, which has to be repaid, where with the credit card you do not have to access the account if you do not want to.
