

think that it is too complicated. It is not. The methods that are part of the *Debt Cures* solutions have, at their core, the underlying fact that you are in control. By taking control of your debt, and taking on the big credit card companies, you should feel a sense of power and an “I can do it” attitude.

That same attitude carries over into building wealth. You learn the secrets that they don’t want you to know and not only do you get out of debt, you have the ability to leverage credit, the bank’s money, to build your wealth.

Every corporation started from scratch with no credit, no history. And virtually every strong corporation built a strong credit profile by doing the methods you have learned. Easy methods like paying your bills on time, not using up all your available credit, and all the other tips that apply to individuals as well. The beauty of having a corporation is that it has more potential than you as an individual.

A corporation
with a strong
credit profile
gets rewarded
with huge
credit lines.

A corporation with a strong credit profile gets rewarded with huge credit lines. It is no exaggeration that someone who creates a new credit record through a corporation can get \$1 million in credit, or even much, much more!

More Benefits

In general, the interest rates on business credit cards are lower than the interest rates you pay on your personal credit cards. The corporation also gets the benefit of being able to deduct the interest as a business expense on their tax return. Also, when a business uses credit to buy something, it is usually something that will make the company money and in doing so, it pays itself off.

Sue decided to start a dog grooming business. Using a corporate credit card or line of credit, she purchased a new sink and sprayer for her basement business. By having better equipment, she gets the job done more efficiently and is able to groom more dogs. She makes more money and can pay off the sink very quickly.
