

There are hundreds and thousands of programs out there. Some have specific restrictions as to how you must spend the money; some do not. Getting the money could even be easier than you would expect. Phone calls and filling out applications is usually all it takes. Some require lots of paperwork, but you can find grants that merely require an easy-to-complete form with information you already know. Whatever office is giving the grant can answer any of your questions.

I hear your question: There is more than one office that gives out free money? Yes. The government is a huge network of offices. You cannot find one that has “Free Money” in big block letters on the door. If there were such an office, I would like the job of being the guy to hand out the checks. It may take a little bit of searching to find the programs that meet your needs, but a small investment of your time is worth the opportunity of receiving money that never needs to be paid back.

Take It!

The big corporations and their lobbyists know all about government money and how to get these grants. They know the system because they work the system; they basically created the system. What you need to know is that government grants are not just for their pals and contributors. It may not be widely known, but it is true: Grants are available to non-profit organizations, small businesses, and you, the individual! These programs are in place and you need to tap into them! The government and the corporate big guys know how to take advantage of you; you need to be aware that you can take advantage of government money that is available to you!

Maybe you’ve gotten frustrated in the past searching out these free money opportunities? Stop banging your head against the wall and keep reading. You no longer have to apply for loans, only to agonize over whether or not you’ll be able to repay once you qualify. I’m not writing about loans; I’m writing about *grants*. Grants that are available to you *right now*, whether you want to pay your bills, fill your children’s lunchboxes, start your own business, pay your property taxes, or put food on the table.

Yes, there are a variety of free money programs you can qualify for! I list some of them in this book, but I don’t even come close to naming each and every single one; there are just too many!
