

could stop debt collectors cold, and I will tell you how two magic words turned one person's nightmare story into a platinum card.

Ignorance is not bliss. In fact, it can be a nightmare. I don't want you to end up like Abby, who was heavily marketed to by credit card companies at age 18. By the time she reached age 21, she had her car repossessed, had 8 credit cards, defaulted on two loans, and was unable to even open a savings account in her own name alone. All this credit was given to her while she was earning minimum wage at a part-time job. It should be obvious by now that the credit lenders do not have your best interests at heart. They don't have a heart.

Read and You Will Be Rewarded

As with all my books, I ask that you read through all the chapters in order and don't skip around looking for a certain issue. Topics are explained as we go, and I want you to understand the whole picture. I am really proud of you for taking this journey and breaking free from the invisible ties that have you all wrapped up. You are in bondage no more!

This book explains how all these legal scams work in the so-called prestigious firms of consumer lending and how the government allows them to do it. We can turn the tables on them. Instead of paying them billions of dollars, this book tells you where to find the billions of dollars that are available to you.

The miserly profit-hoarding consumer lending industry will be exposed for what it is. When you learn the nuts and bolts of the industry, they will no longer be able to put the screws to you. I know the rules, and now you will too. Together we can stop the insanity. For everyone who is sick and tired of the money games and wants relief, *Debt Cures* is the answer. The consumer lending industry profit is obscene, and basically every single person is paying too much. That is the point of this book. We no longer have to be victimized by big corporations and the government. We can stop being slaves to the banks. We can stop being owned by the credit card companies. Their license to steal is being put through the shredder. It is time we simply say, "No more." It is time we become, once again, free.
