Applying: Easy Peasy

Once you’ve determined which grants are right for you, it’s time to start applying for them. There’s no need to drag your feet because you’re worried that the process will be time-consuming and difficult. *It’s not.* Don’t let anything deter you from getting the free money that you need. You’ve come so close already. Why not take some extra time to sit down and apply? Think about it: an afternoon (could be more, could be much less, depending on the grant) of filling out grant applications could lead to major amounts of free money in the near future! If that’s not time well spent, I don’t know what is.

All grants are different, so be sure to carefully read through the qualifications and instructions for applying. If there’s anything you don’t understand, you can always call the agency or foundation that you’re applying to.

Applying for many of the grants is an easy process. And actually, I’ve made it even easier by coming up with some great tips that’ll help you along the way...

Know It

Make it your mission to really understand what it is you want. This especially comes into play if you’re thinking of putting together an organization or business.
