

Another Technique for Anyone & Everyone – Cut Your Payments in Half!

Phone Calls Can Save You Thousands!

Phone calls are usually easy, time efficient, and believe it or not, effective. Most people assume that a phone call is a waste of their time, so they don't make them. Nothing is further from the truth. Pick up the phone and dial. Don't let your nerves get the best of you. Why in the world should you be concerned with what the person on the other end of the line thinks of you? Make the call. It is the most valuable thing you can do with your next five minutes, and it can save you thousands.

Interest Rates

Call up your credit card companies. Their phone number is right on the back of your card. Ask what your current interest rate is, then ask them to lower it. If the first person you speak to doesn't help you, ask to speak to a supervisor. If they say "no," call back. Keep trying. Don't give up. It may take seven calls, but I believe that the vast majority of the time, they will lower your rate, simply because you asked.

It really is that simple. Take Vendel and Gwen – they had a whopping 29.75% interest rate on their Bank of America card. After calling up their credit representative, their rate was lowered to 5.75%, and they get to keep that rate for 5 years! They used the same technique to lower the rates on their three other cards.

Hang on to all those credit card offers you get in the mail today. (If you don't get one today, bet you do tomorrow.) When the customer service person tries to give you the brush-off, you can say, "I'm holding an offer that I got yesterday in the mail from Super Credit Card Bank. I will transfer my balance over to them today if you do not give me a better rate." I kid you not, you should get results. Lowering your interest rate instantly lowers your payments. You have just lowered your debt! Immediate results like that are very empowering!

As long as you carry a balance on any card, it's possible that your credit card company could raise your rates, without you knowing, so it
