

payments for a period of time when there does appear to be a logical reason for the temporary reduction. If the reduced payments are within 75 percent of the actual payments, there is usually no difficulty in getting the creditors to accept a reduced payment plan indefinitely. Obviously that depends on the creditor. Some are restricted by company policies. In those cases it is often necessary to appeal to higher management. In almost all cases they will require a third party to negotiate on behalf of the debtor.
