

6.3.9 Brainstorming Sessions

It can also incite creativity in brainstorming through idea suggestions and prompts for discussion, aiding participants in arriving at varied angles or views about a given subject. ChatGPT can respond to inputs from many perspectives, making it convenient for teams to flesh out different ideas based on the interests and needs of several personas.

ChatGPT can adopt different personas or viewpoints, allowing teams to consider ideas from various stakeholders' perspectives, thus broadening the scope of the brainstorming session.

For businesses seeking a competitive edge, ChatGPT may propose new product features, pioneering marketing ideas, or a brand-new approach to some of their knottier organisational problems.
