

6.4 Evolution of ChatGPT

Since its 2022 debut, ChatGPT has evolved through several versions, each building on the last. Every update improved the user experience and broadened its potential.

Here’s a quick rundown of the different versions:-

Release Date	Version	Description
13/05/2024	GPT-4o	Multimodal model capable of processing and generating text, images, and audio • Achieved state-of-the-art results in voice, multilingual, and vision benchmarks • Free within usage limits, with higher limits for paid subscribers
18/07/2024	GPT-4o mini	Smaller, cost-effective version of GPT-4o • Replaced GPT-3.5 Turbo on the ChatGPT interface • API costs \$0.15 per million input tokens and \$0.60 per million output tokens
12/09/2024	o1-preview	Preview of OpenAI's o1 model • Designed to "think" before answering, enhancing complex reasoning tasks • Outperformed GPT-4o in areas like competitive programming, mathematics, and scientific reasoning
05/12/2024	o1	Full release of the o1 model • Capable of advanced reasoning through chain-of-thought processing • Integrated into ChatGPT, offering improved accuracy and transparency in responses
20/12/2024	o3	Successor to the o1 reasoning model • Introduced alongside o3-mini, a lighter and faster version • Focused on enhanced reasoning capabilities and efficiency
02/02/2025	Deep Research	Agent leveraging OpenAI's o3 model • Performs extensive web browsing, data analysis, and synthesis • Delivers comprehensive reports within 5 to 30 minutes
27/02/2025	GPT-4.5	• Latest iteration of OpenAI's GPT models • Features reduced hallucinations and enhanced pattern recognition, creativity, and user interaction • Represents a step toward developing artificial general intelligence (AGI)
