

7.4.3 Example

Suppose you want to describe the plot of *Inception* in a single line: Since interpretations can be subjective, and the movie goes off on an open-ended note, you will generate multiple drafts using ChatGPT. You will also ask ChatGPT to review each draft to see which is the best.

You will use this prompt:

I want you to describe the plot of the movie 'Inception' in one line. Create four drafts for this and then evaluate each response to see which one aligns best with the overall narrative and themes of the movie.

Prompt

Self-consistency

Response

Four One-Line Summaries of *Inception*

1. "A skilled thief who specializes in stealing secrets from dreams is tasked with planting an idea in a target's mind, blurring the line between reality and illusion."
2. "In a world where dreams can be manipulated, a team of specialists embarks on a high-stakes heist inside a billionaire's subconscious."
3. "A man haunted by his past must navigate layered dreamscapes to complete an impossible mission and find his way back to reality."
4. "A mind-bending thriller where a dream thief attempts the ultimate heist—planting an idea deep enough that it feels like it was always there."

Evaluation of Each Summary

1. Best for capturing themes of reality vs. illusion.
 - Strengths: Highlights the protagonist's expertise and the core concept of *Inception* (planting an idea).
 - Weaknesses: Doesn't emphasize the heist aspect enough.
2. Best for focusing on the heist and sci-fi setting.
 - Strengths: Clearly presents the heist structure

This is what you got in response.

Self-consistency generates multiple responses, choosing the most coherent one.
