

9.2 How are people using LLM models like ChatGPT?

Through ChatGPT and Bing's Copilot, based on GPT 4.0, users can do multiple things, such as building branding ideas, personal brands, planning, event management, etc.

So, first, let's look at some of the generic use cases and then see how you can utilise ChatGPT better through its advanced use cases. Some of the generic use cases of ChatGPT are as follows:

1. Ideas and Brainstorming

Suppose you want to build the brand of one of the companies you have in mind. You want this tool to guide and help brainstorm ideas. You also want it to come up with an entire brand book.

Well, guess what!

You do not need anybody anymore. You can use ChatGPT via prompt engineering to get it done. Suppose you input a prompt saying,

I want you to become a branding expert and assist me in building a brand book. My company is into providing corporate training solutions concerning AI and digital transformation. Can you assist me with a good brand name?

Build a brand using this tool
for brainstorming

few suggestions:

1. AlmpactPro
2. TransformEdge
3. InnovateCorp
4. DigitalMastery Solutions
5. Alcademy Pro
6. TechTransformers
7. IntelliTrain Solutions
8. FutureForge

When inputting this prompt, ChatGPT gave this response.
