

Let's understand this through examples.

9.4.1 Automating Routine Administrative Tasks

Here, you will see five examples of AI automating routine administrative tasks.

Calendar Management

There are several ways in which AI can make your schedule more efficient and help you prioritise your commitments. Here's how you approach this. You simply open ChatGPT and tell your schedule for the week.

You had training sessions from 18th September, from 10 a.m. to 5:30 p.m. every day, followed by meetings from 2 p.m. starting on the 23rd. You also had another training from 30th September to 2nd October.

Schedule tasks and prioritise commitments

Create an illustration for a bakery

Text inviting neighbors to barbecue

What's in the news in Tokyo today?

Design a fun coding game

Here is my next week's schedule. I have a training from 18th Sept to 19th Sept. It will get over by 5:30 pm, starts at 10:00 am, Also I have a date free from 20th to 22nd, then from 23rd I have meetings everyday from 2:00 pm to 6:00 pm and I have trainings again from 30th Sept to 2nd October. Can you first make a calendar and then help me with optimizing my time for exercise, pitching new clients, and have investor meetings. Please assist me.

You asked ChatGPT to help optimise your time for exercise, client meetings, and family trips.
