

The AI then analyses your schedule and highlights available times. It suggested scheduling exercise sessions between 6 p.m. and 7 p.m. or using Saturday for family activities, as it's generally more relaxed. It also recognised periods for client pitch calls, investor meetings, and even lunch breaks. It did all this without specifically requesting some of these details.

This automation creates a balanced calendar, prioritising personal and work activities effortlessly.

Chat GPT's response optimising time effectively

Here's a schedule to help you optimize your time for exercise, client pitches, investor meetings, and family day trip:

September 18-19 (Training Days)

- Training: 10:00 am - 5:30 pm
- Evening (6:00 pm - 7:00 pm): Light exercise (yoga, stretching)
- Evening (7:30 pm - 8:30 pm): Investor research or pitching preparation

September 20-22 (Free Days)

- Morning (7:30 am - 8:30 am): Exercise (run, gym, or cycling)
- Day (9:30 am - 12:00 pm): Client pitch calls or meetings
- Afternoon (1:00 pm - 2:30 pm): Investor meetings (remote or in person)
- Evening (4:00 pm - 6:00 pm): Family time
- Day Trip with Family:
 - September 21 (Saturday):
 - Morning (8:00 am - 10:00 am): Depart for nearby destination
 - Day (10:00 am - 5:00 pm): Activities and leisure
 - Return (5:30 pm onwards): Evening relaxation

September 23-29 (Meetings 2:00 pm - 6:00 pm)

- Morning (7:00 am - 8:00 am): Exercise

You can use image analysis for more advanced scheduling by uploading a screenshot of the calendar. In ChatGPT's paid version, paste your calendar image and request it to find time for exercise and family activities. The AI scans the image, identifying free slots and suggesting the best times.
