

Chat GPT's Response

I can see your Google Calendar for September. Here's a breakdown of available time for exercise and a family picnic based on the visible events:

Time for Exercise:

- **September 18-19:** Training days, but after 5:30 pm, you have some free time for a light workout or stretching (6:00 pm - 7:00 pm).
- **September 20:** You can exercise in the morning around 8:00 am or before the 10:00 pm task. Alternatively, an evening walk or light workout at 8:30 pm works after your tasks.
- **September 21:** You have events starting at 10:00 am, so morning (7:30 am - 8:30 am) looks good for exercise.
- **September 23-26:** Early mornings (7:30 am - 8:30 am) are free for workouts before your sessions at 9:30 am.
- **September 27:** Exercise could fit before the 10:00 am meeting, around 7:30 am.
- **September 30:** You can ●

Identifying free slots and suggesting the best times

- **September 27:** Exercise could fit before the 10:00 am meeting, around 7:30 am.
- **September 30:** You can exercise in the morning around 7:30 am before your 10:00 am training program.

Time for Family Picnic:

- **September 20:** You are relatively free after 12:00 pm (except for a task at 10:00 pm). This could be ideal for a day trip with family.
- **September 21:** This day has events from 10:00 am and 2:00 pm, but a half-day trip could still work from 3:00 pm onwards after your IIT Jammu event.
- **September 22:** The entire day seems free, so this would be perfect for a longer family picnic or day trip.

Let me know if you'd like adjustments!

Intuitive, detects patterns, and offers smart scheduling recommendations.

This approach is also adaptable for privacy concerns. You can explore more secure setups through paid options like Azure OpenAI, which provides additional privacy.

By giving your AI tool your calendar details and priorities, you can seamlessly automate your schedule, balancing work and personal needs. This method helps you stay organised without manually combing through your calendar, making calendar management much more accessible.
