Since much of the data for Samsung S24 is missing, you ask ChatGPT to fill in these gaps.

ChatGPT fills the gaps where data is missing

ChatGPT 3.5

ChatGPT

The data for Samsung Galaxy S24 seems to be unavailable at the moment. However, you can find detailed specifications and features of the Samsung Galaxy S24 on Samsung's official website or reputable tech review sites once the information becomes available.

ChatGPT has verified that this data is not yet available.

Let's see another example. You ask ChatGPT to generate a list of recent tools in generative AI for text-to-video. This research task cannot be executed using the traditional or free ChatGPT.

After enabling web access, you got the following response.

ChatGPT 3.5 Memory Off

into video content. Here are some notable ones:

- Synthesia:** Synthesia utilizes generative AI to convert text into video content with realistic voice and animation[1].
- HeyGen:** HeyGen is an AI video creation tool that transforms text into presentation-style videos. It offers customizable AI avatars for personalized content creation[5].

These tools leverage cutting-edge AI algorithms to automate the process of creating video content

Traditional ChatGPT can't execute research on recent text-to-video tools

So far, you have seen that this hack helps make ChatGPT access the internet and crawl for data. If you need far more accurate and reliable responses, you can use Bing's Copilot, powered by ChatGPT 4.0 which has the same functions as ChatGPT. Let's try the same prompt from before, i.e. the phone comparison prompt.

Now, Bing searches the internet in real time. It is recommended that you use Copilot over ChatGPT for research purposes. It can give you far more accurate results than any other tool in the market right now.
