

The leading utility of this tool is that you do not have to manually copy and paste the document based on the token limit. The size of your file does not matter. The extension can still be divided into parts and uploaded one by one.

So, if you want to chat with your data using ChatGPT, you can follow the same steps that you took here. However, this can be a tedious process. ChatGPT may hallucinate and not give accurate answers.

So, another alternative to this is to use the Ask Your PDF website. This is a PDF chat application.

You can upload PDFs, text files, presentations, and files saved in EPUB and RTF formats here.

You will upload the same whitepaper as before.
