

This is a fantastic application for researchers. You can use this tool for any kind of document. It could be a legal paper, a report, or a government notice. You can use this software for free and talk to your data.

These tools can help you increase your productivity and eventually take it to the next level. Go ahead, try them out, and see their applications for yourself. The advanced ChatGPT section was all about breaking the limitations of ChatGPT through Chrome extensions or using free alternatives.

For performing research where you need to crawl websites, use Bing's Copilot. If you want to chat with your documents, use Ask Your PDF. If you're going to do both on ChatGPT, install Chrome extensions. you used WebChatGPT to enable access to the web on ChatGPT, and you used ChatGPT File Uploader to upload files on ChatGPT.
