

Let's review a few examples to help you understand these use cases.

10.1 Marketing

Generative AI is a very powerful tool for marketing professionals. Let's see some AI tools that can help you speed up building a marketing campaign. As usual, first, open a new chat on ChatGPT.

Now, you must give ChatGPT the type of company you belong to and our products. Then, you ask it to build the entire marketing plan. So, you enter a prompt saying,

I am the CEO of a real estate company helping people find luxury apartments in Mumbai and Dubai. Can you help me get web page content for my products? Also, my company is called 'Luxe Café' – with our slogan being 'Designing homes that people love'.

ChatGPT

Absolutely, I'd be happy to help craft webpage content for Luxecafe. Here's a draft for your luxury apartment listings in Mumbai and Dubai:

Welcome to Luxecafe: Designing Homes that People Love

At Luxecafe, we understand that finding the perfect luxury apartment is not just about space; it's about finding a place that truly resonates with your lifestyle and aspirations.

Message ChatGPT

Introduction Prompt -
CEO Input: Company Overview

Welcome Message -
Personalized Welcome Text

When you entered this prompt on ChatGPT, it generated all the content, including a welcome message, a company description, how you connect people with their dream homes, and some reasons for choosing you. The response you got looked something like this.
