

1.6 AI tools on the rise

At the time of writing, there were nearly 120 AI tools available, with ChatGPT—an innovation that has captured global attention—representing just a fraction of the vast AI landscape. In fact, over 2,000 new AI tools were launched in the 30 days leading up to this writing. As time progresses, the number of AI tools is expected to surpass 10,000, with advancements occurring at an unprecedented pace.^[1]

Number of AI Tools Growing Rapidly

One of the most common questions I hear is whether the AI revolution will disrupt us or empower us.

The truth is, it's not a matter of disruption versus embrace—it's about how we choose to adopt it. Many worry that AI will take away jobs, but let me assure you: AI won't replace humans.

Instead, those who learn to effectively use AI will hold a significant advantage in the future workforce. It's not about competing with AI—it's about leveraging it to enhance your skills and opportunities.
