You can also add a relevant hashtag, such as #LabradorRetriever, #puppy, #dogfood, or #cuteanimals.

You can see that you have three types of captions: cute, descriptive, and humorous. You did not even need to ask Gemini for the options. It can help you understand the context of the post and give options accordingly.

After seeing these options, you asked Gemini to expand on the second caption from the cute and playful category to create social media content. This is the response you got.
