

ChatGPT can help draft Instagram DM pitches to influencers for collaborations. For example, when reaching out to influencers for a dog food brand, you can request a pitch that isn't overly sales pitch-like but builds a connection. It can also refine the pitch for brevity.

This was the first influencer pitch generated by ChatGPT and was too long.

I want to pitch influencers for my dog food. Can you make me a small Instagram pitch on DM. Do not make it extremely salesy. Try to build a connect over chat.
