

Now, let's check whether this information is accurate or not. To do this, open the Excel sheet and determine your top 10 customers.

Go to the insert tab and click on 'PivotTable.'

When you see the following screen, click on 'OK.'

In the pivot, add customer names in the rows section and the sum of sales in the values section. In the screen grab, you can see a search bar in the right-hand side panel. Search for whichever column you need and drag it to the appropriate field from filters, columns, rows and values.

Add customer names in the rows section and the sum of sales in the values section
