

Once ChatGPT summarised the insights from its analysis, it started loading the graphs and charts. This is the true power of ChatGPT. Imagine that you want to find some hidden patterns in the data. You might not have been able to do so earlier, but today, you can do it with ChatGPT.

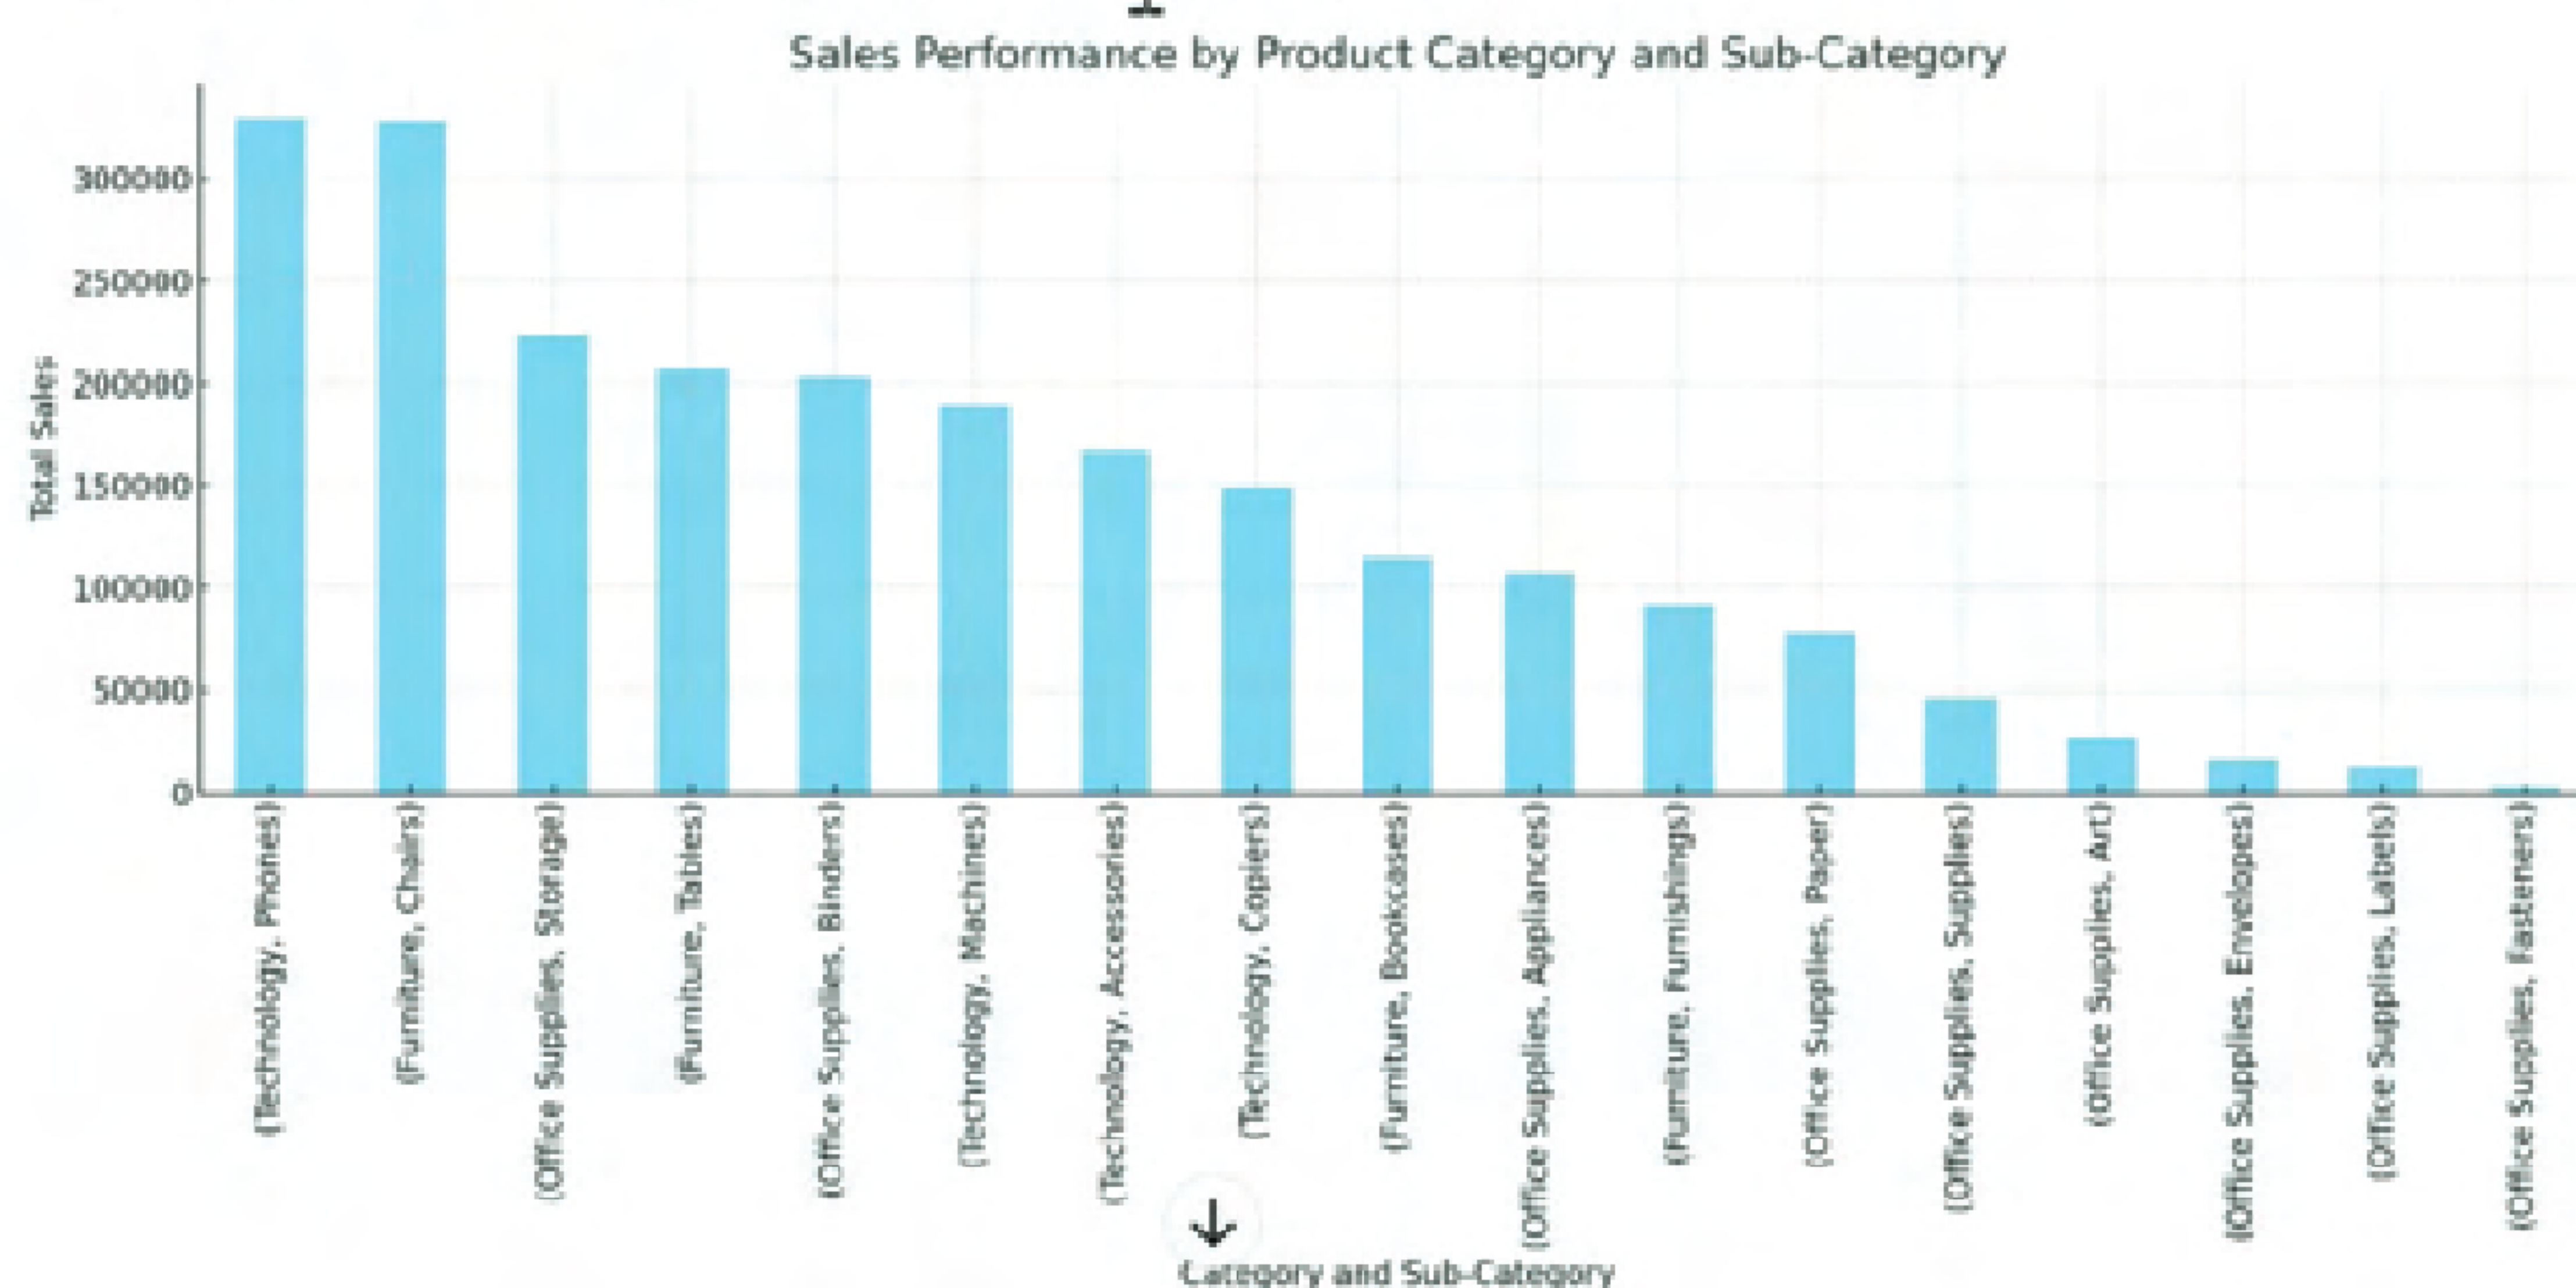

The monthly sales trends graph shows the maximum sales in July.

Let's start by creating these visualizations. I'll begin with the sales trends over time. Let me prepare that data.

The monthly sales trends graph shows the maximum sales in July. Most revenue comes from phones and chairs, as observed in the sales performance by product category and sub-category graph.

may need more focus or improvement. Let's create that visualization now. >-]

Most revenue comes from phones and chairs, as observed in the sales performance
