

EXERCISE

Using AI Tools Across Business Functions

Instructions:

Read the scenario and craft an optimized prompt using AI tools like ChatGPT for different business functions.

Scenario:

You are a department head in a company looking to integrate AI tools into daily operations. You want ChatGPT to assist in automating tasks, generating insights, and improving efficiency in areas such as marketing, sales, customer service, or data analysis.

Task:

1. Write a structured prompt that helps ChatGPT provide tailored solutions for your department. Your prompt should: Specify your department (e.g., marketing, sales, customer service, finance, etc.)
2. Define the key tasks you want ChatGPT to handle
3. Set expectations for output format (e.g., reports, scripts, responses, strategies)

Write your fine-tuning prompt below:

Reflection:

How would fine-tuning benefit different industries? Give one example.
