

This chapter discusses three essential tools for three key tasks.

Task	Tool
Presentations	Gamma
Chatting with documents	ChatPDF
Build websites	Durable

While there are many other Gen AI tools for presentations, such as SlideGPT and Presenter.AI, Gamma is among the best so far.

A tool called ChatPDF is used for chatting with documents, and a tool called Durable or 10web.io is used for building a website. Let’s look at these three tools and see how they really work.

11.1.1 Presentations

Let’s open the website called ‘gamma.app.’ It’s a completely free and even gives up to 400 credits for signup. Once you sign up here, you can generate presentations from scratch using AI. Let’s understand how it really works.

Generate Presentations From Scratch
