

So, some office background and a product photograph as well are also generated. You can do many things with this tool called Stable Diffusion Web.

You can use Stable Diffusion to create logos as well. This is the result you get when you ask it to make an abstract logo with the letter 'S' shown as skills under the fantasy art image style.

Most AI image-generation tools out there today use Stable Diffusion.

One advantage of Stable Diffusion is that it can insert text inside the images. This is a feature that is missing from many other tools. These are the results you got when asked to use its default style to make a realistic image of a tall, slender brown woman with curly hair who is holding a board that says 'Hitesh'.
