

Once Again, Input The Same Prompt.

For this tool, choose a model, and let's select Vision Leonardo XL.

Select Vision Leonardo XL

Now, how do you know which is the best model? It comes from iterating images again and again. If you want more realistic images, go for vision. If you want more animation, there used to be a model called Alfredo, which has since been discontinued. So, you can use Diffusion XL, Vision XL or even Albedo Based XL.
