

These datasets are currently available with a few companies. The enhancement of generative AI is brought on by three big firms: OpenAI (made ChatGPT), Anthropic (made Claude), and Google (made Gemini and earlier made Bard).

Generative AI Can Do Four Main Things:

Generate an image of Cat with Blue eyes

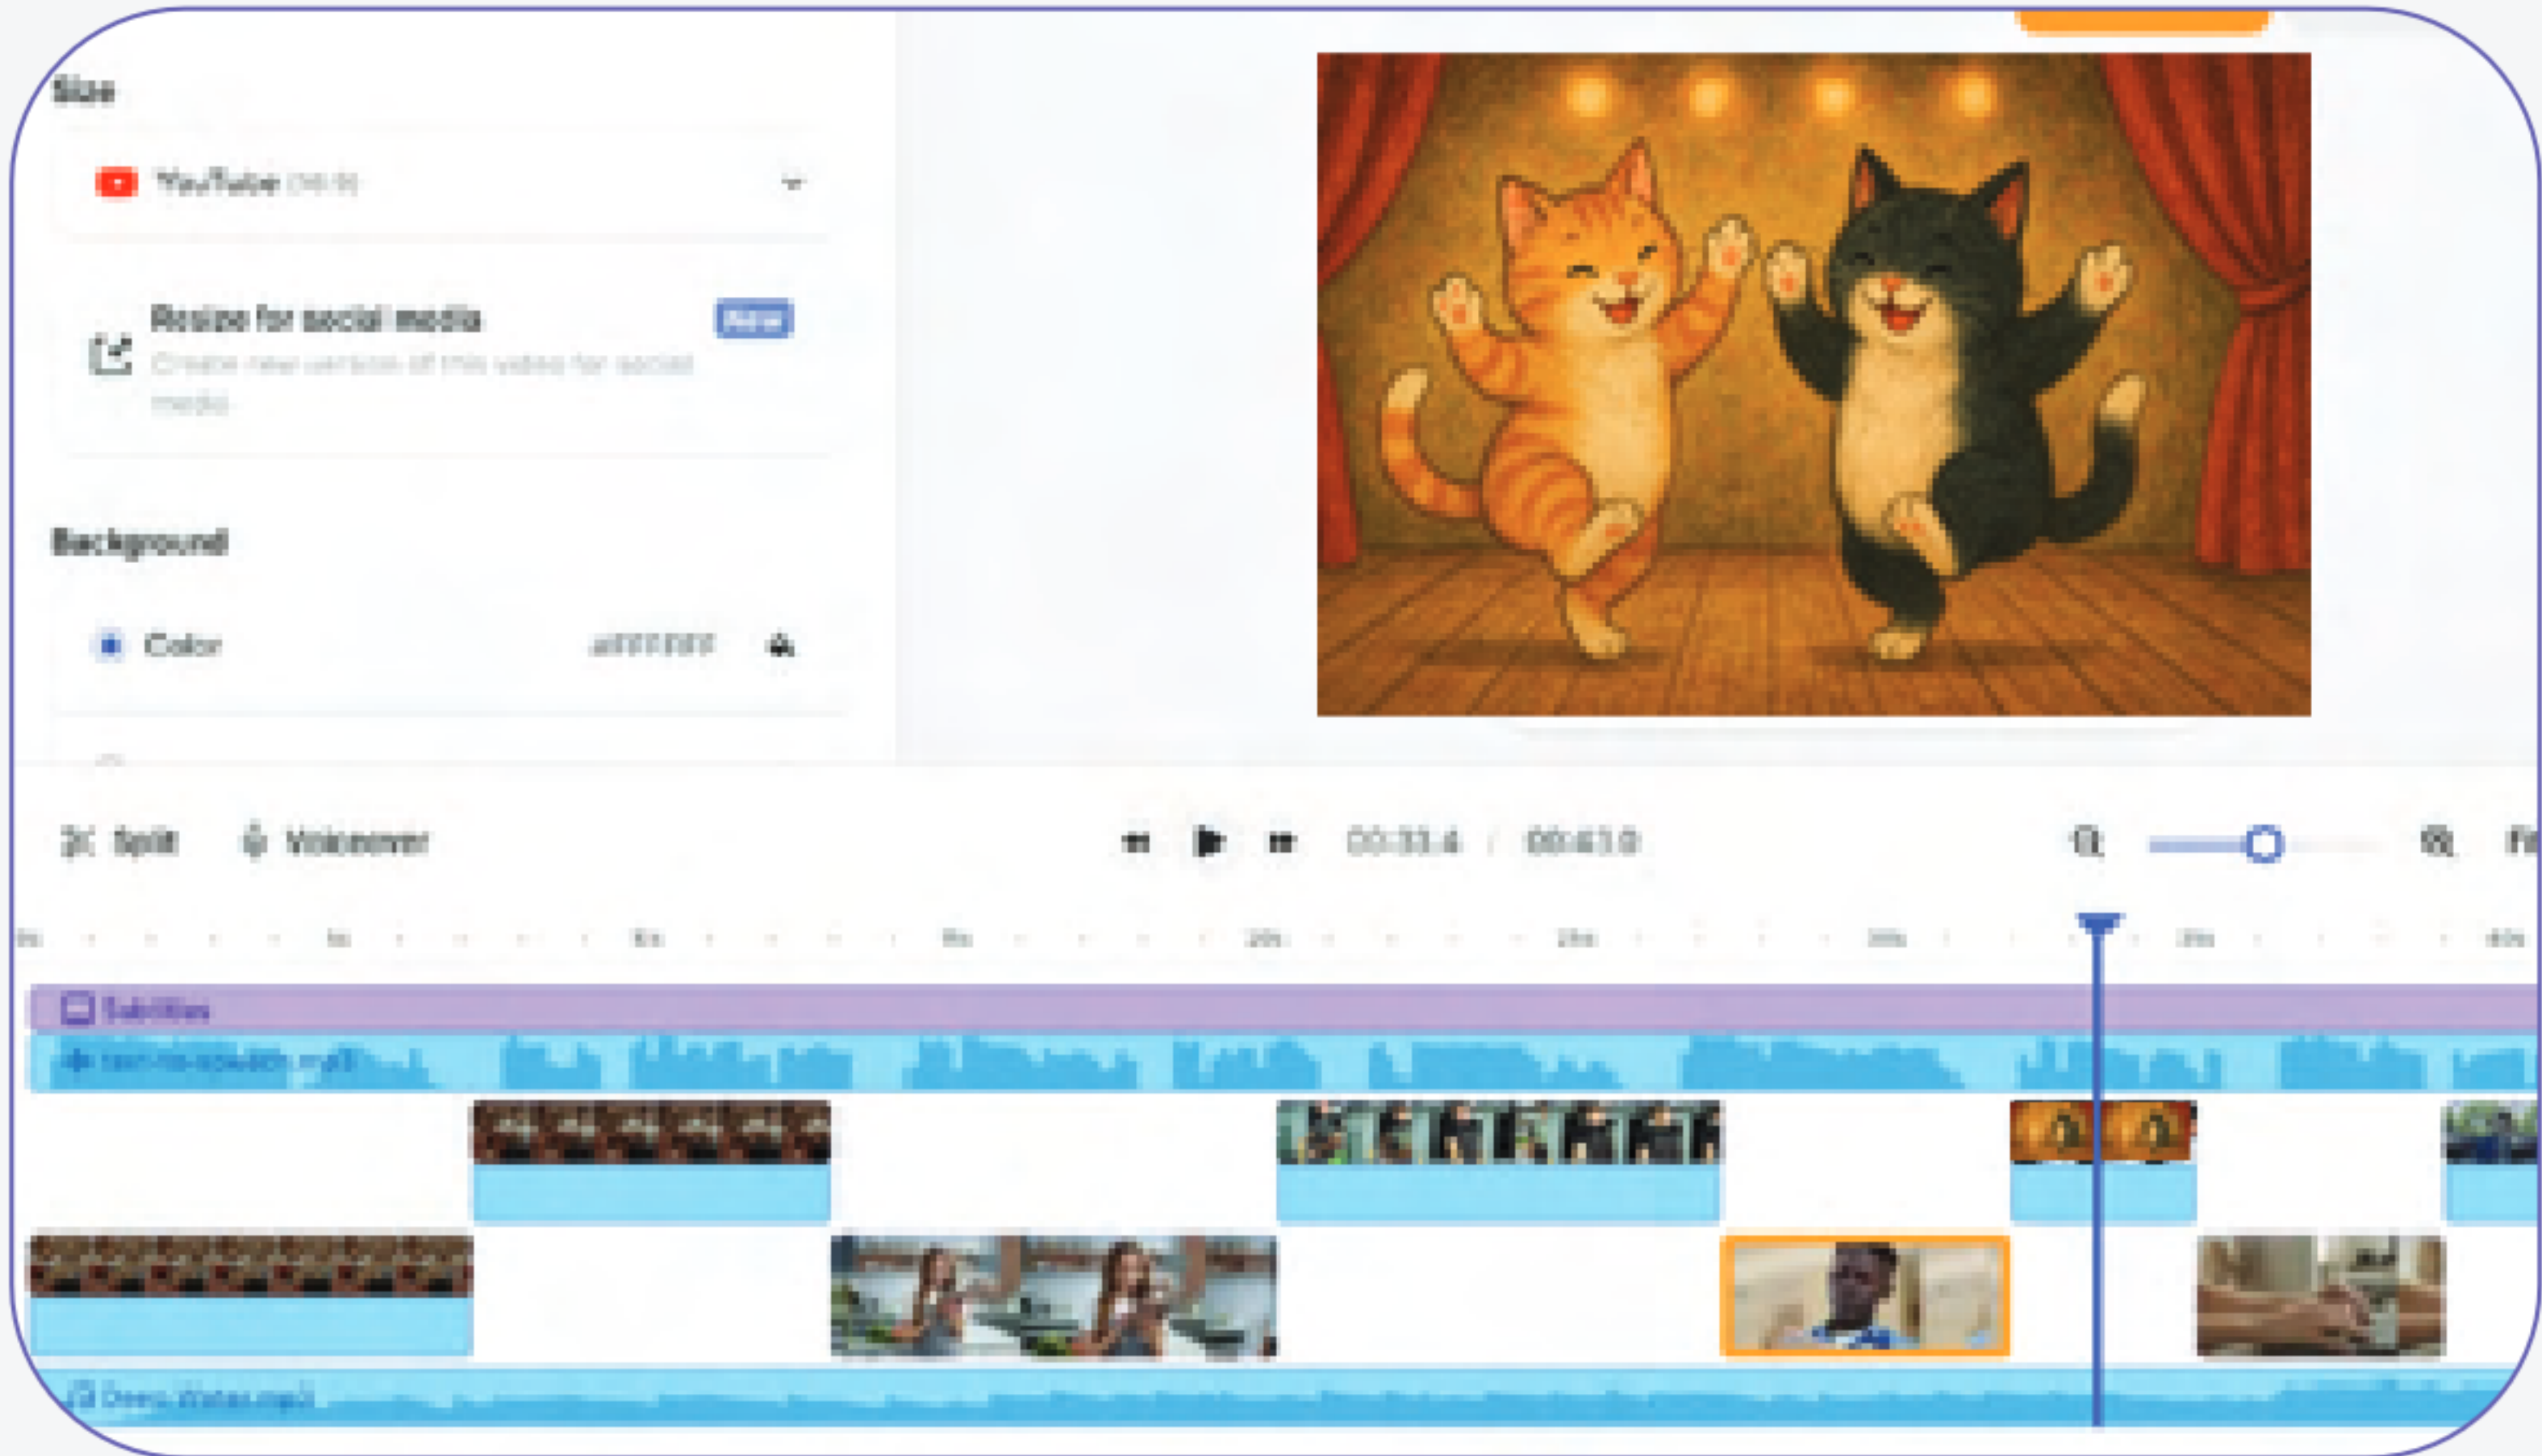

Text to Image

Creating ultra-realistic images.
The following AI-generated images show that AI can generate realistic human photographs, digital art, and realistic photographs.

Generate a video of two cats dancing on the stage

Generate A Sound Of Car Whizzling
