

Let’s show you how you can use AI tools to make videos. This segment will show extensive video generation tools using text prompts. Not only that, you are also going to see how to create more interesting video editing or build some AI avatar-based videos.

Some of the tools you will use in this segment are:

Task	Tool
Create video ideas	ChatGPT, Gemini, and Bing’s Copilot
Image to video	RunwayML
Create videos	Veed.io
Create subtitles for the video	Veed.io
Avatar-based talking head videos	Synthesia, HeyGen, and TokkingHeads

In these examples, you will either try to generate a video from scratch through AI or use sample videos. Record a short 1-minute video to explore AI’s video editing capabilities.
