

The output was pretty good, considering that with just one text prompt, the tool could put a clip together with a voice together, and before that, it even wrote a script for the video. All of this requires just one prompt and one click from the user.

Let's understand how to get a voice-over for a video you already have.
You can use the same tool for this.

To demonstrate this, go back to the homepage of veed.io, log in and create a new project.
