

When you click on the video button, a smaller window will open. Here, you can choose to add one of the free or premium videos as a B-roll. You can also choose from the B-rolls you saved or uploaded earlier.

11.4.7 InVideo.io

InVideo.io is a text-to-video tool which has a library of stock footage and can generate voiceovers to accompany videos based on text prompts. This process takes only a few seconds as the AI incorporates elements such as audience targeting, visual style, and platform compatibility.

In the demonstration, you opened InVideo.io and entered a prompt asking for a video about the process of manufacturing a car.
