

At this point, return to ChatGPT and ask it to add a delete button to the tasks being added. ChatGPT, once again, generated a code. Once you run this new code, you should be able to see the delete button. All of this happened within a few seconds.

It makes you reflect on how fast software development has become.

Prompt for adding delete button

I want to add delete button to the task which are being added

ChatGPT's Answer

ChatGPT

Adding a delete button to each task in your Todo list app involves modifying the JavaScript to create a button element for each task and defining a function to handle the task removal. Here's how you can update your JavaScript and make slight changes to your HTML and CSS for this functionality.

You do not need to worry about looking at the code and running a code. A non-software developer can also develop software using generative AI tools. Once again, copy and paste the update code into the appropriate files. This is what the new files looked like.

updated index.html

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Todo List</title>
7   <link rel="stylesheet" href="styles.css">
8 </head>
9 <body>
10  <div class="todo-container">
11    <h1>Todo List</h1>
12    <input type="text" id="taskInput" placeholder="Add a new task">
13    <button onclick="addTask()">Add Task</button>
14    <ul id="tasksList"></ul>
15  </div>
16  <script src="app.js"></script>
17 </body>
18 </html>
19
```
