

Copilot makes multiple suggestions, as you can see in the following screenshots.

```

3  <head>
4    <meta charset="UTF-8">
5    <meta na < 1/3 > Accept [Tab] Accept Word [Ctrl] + [RightArrow] ..., initial-scale=1.0">
6    <title> |To Do List </title> |
7    <link rel="stylesheet" href="styles.css">
8  </head>

```

```

3  <head>
4    <meta charset="UTF-8">
5    <meta na < 2/3 > Accept [Tab] Accept Word [Ctrl] + [RightArrow] ..., initial-scale=1.0">
6    <title> |To Do List App </title>
7    <link rel="stylesheet" href="styles.css">
8  </head>

```

```

3  <head>
4    <meta charset="UTF-8">
5    <meta na < 3/3 > Accept [Tab] Accept Word [Ctrl] + [RightArrow] ..., initial-scale=1.0">
6    <title> |Todo List </title>
7    <link rel="stylesheet" href="styles.css">
8  </head>

```

Once you see the suggestion you like, you can simply press the tab, and the code will be written into the file.

```

3  <head>
4    <meta charset="UTF-8">
5    <meta name="viewport" content="width=device-width, initial-scale=1.0">
6    <title> Todo List </title>
7    <link rel="stylesheet" href="styles.css">
8  </head>

```

If you want to add more input but do not know what kind to use, you can create the input tag, and Copilot will make suggestions. In this case, it suggested a date input.

```

9  <body>
10   <div class="todo-container">
11     <h1>Todo List</h1>
12     <input type="text" id="taskInput" placeholder="Add a new task"> |
13     <input type="text" id="taskInput
14     <button onclick="addTask()">Add Task</button>
15     <ul id="tasksList"></ul>
16   </div>
17   <script src="app.js"></script>
18 </body>

```
