

12.5.2 Helping You Remember Stuff You Forgot

As time passes and you specialise in certain types of code, you tend to forget other things you have learned. You may forget some basic syntax, codes or methods. So, if you use a certain type of code after a long time, you could ask ChatGPT about the related best practices.

12.5.3 Extending and Refactoring Existing Code

Sometimes, you need to convert a Java code into a C++ code, a C++ code into a Python code, .NET into Java, and vice versa. Much time goes into such tasks, but today, AI tools can take up this task for you and deliver it much faster.

12.5.4 Explaining Unfamiliar Code (& Documenting)

If you are looking at someone else's code or code unfamiliar, you can ask ChatGPT to explain each element and the code. `
