

2.2.7 Code Generation

Coding can be difficult and exhausting at times. However, ChatGPT can help you by generating code for various applications. Suppose that you are creating a game of Snake in HTML and JavaScript. Now, you need to generate data to train machine learning models.

ChatGPT Code

ChatGPT

Of course! Creating a simple Snake game using HTML and JavaScript can be a fun project. Here's a basic outline to get you started:

HTML:

html Copy code

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=
```

ChatGPT generates code for applications.

ChatGPT can provide this data in table format if you give it a desired prompt.

I want to train a ML model to recognize movie genres, can you help me with syhthetic data. Give me 100 movie titles and genre

ChatGPT Response in Table form

ChatGPT

Sure, here are 100 synthetic movie titles along with their corresponding genres:

- 1. The Shadow Within - Horror
- 2. Galaxy Explorers - Science Fiction
- 3. Love in the Time of War - Romance
- 4. The Haunted Mansion - Horror
- 5. Quantum Quest - Science Fiction ●
