

Creating Your Own Prompt

Now that you have learned about the various functions of Conversational AI, it's time to put your understanding into practice!

Task:

Think of a real-world scenario where you might need help from a Conversational AI tool like ChatGPT. Then, craft a well-structured prompt to get the best possible response.

EXERCISE

Instructions:

1. Choose a task you want ChatGPT to perform, such as:

- Writing a blog post
- Summarising an article
- Generating creative dialogues
- Translating a paragraph
- Classifying text
- Writing code

2. Write a clear and specific prompt for ChatGPT. Ensure your prompt includes:

- A detailed request (e.g., "Write a professional email to request a meeting.")
- Any necessary details (e.g., "The meeting is about a new project proposal.")
- A preferred tone or style (e.g., "Make it polite and formal.")

Example Prompt

"Can you generate a short social media post for a sustainable fashion brand promoting eco-friendly handbags? The tone should be engaging and highlight the brand's commitment to sustainability."

3. Test Your Prompt:

- Now, input your prompt into ChatGPT and observe the response.
- Reflect on whether the response meets your expectations.
- Modify your prompt to make it more specific if needed.
