

You will notice that this social media post is much better than the previous response. This is just because of how we prompted it. Now, see what happens when we use act as prompting. Now, simply write this:

Add one line asking ChatGPT to act like a marketing head

Act as Prompting

Act like a marketing head who is known to make viral content.

Write me a social media post for an organic lipstick brand. My target audience is females between the ages of 25 and 35 who want to be stylish and not harm any animals or their skin.

They wish to have a chemical-free experience that will have adverse reactions. The lipstick comes in 20 plus shades, perfect for every occasion and is made with nature's love. The post is for Instagram, and it should be engaging. The aim is to get this content shared by as many people as possible. Do not give me regular social media posts, usually written by many brands in the same category.
