

Let's also see an example of a few-shot prompting where you can give examples of your content. You can simply say:

You have given the bot a format of the content. You ask it to share a few shocking stats or statements, introduce the product, discuss why the customer should choose the product, add a call-to-action (CTA), and justify the reason. Let's see what happens with this technique.

Chain Of Thought Prompting

I want my social media post to have the following format. Shocking stats or statements + introducing Hero product (Care4u lipstick), why choose us, CTA to go and check us out, share the love.

ChatGPT's Social Media Content

ChatGPT

Absolutely, let's craft an attention-grabbing post with that format:

🔥 Did you know that the average woman unknowingly ingests over 4 pounds of lipstick in her lifetime? 🚗 That's right, your everyday lipstick might be harboring more than just a pop of color!

Introducing our hero product: Care4u Lipstick! 🌿 Formulated with your well-being in mind, our lipstick not only adds a touch of glamour but also cares for your health. Made from all-natural ingredients and free from harmful chemicals, it's a lipstick you can trust.

Why choose us? Because we believe beauty should never compromise your health or ethics. With Care4u Lipstick, you can slay your look without worrying about the consequences.

Chain of thought prompting refines responses by adding follow-up prompts

Now, you have the content in your style and format. This is called few-shot prompting because instructions and examples are likened to shots, and instead of giving just one shot, we give ChatGPT a few shots. You could have also provided an example of my social media posts.

So, you can instruct the LLM regarding the style and give examples to improve the content. This is the most used prompt technique. We all have examples crafted in the style we prefer, and we can provide multiple instructions regarding what to focus on and what to avoid.
