

Stop Sequences

The screenshot shows the OpenAI Playground interface. The main text input area contains the prompt "Write a tagline for an ice cream shop." Below the input area, a green "Submit" button and three circular icons (refresh, redo, undo) are visible. On the right side, a sidebar contains various parameters: Temperature (1), Maximum length (256), Stop sequences (a text input field with a placeholder "Enter sequence and press Tab"), Top P (1), Frequency penalty (0), Presence penalty (0), and Best of (1). A tooltip is displayed in the center of the interface, stating: "Up to four sequences where the API will stop generating further tokens. The returned text will not contain the stop sequence." A purple callout box highlights the "Stop sequences" parameter in the sidebar.

Top P

The screenshot shows the OpenAI Playground interface. The main text input area contains the prompt "Write a tagline for an ice cream shop." Below the input area, a green "Submit" button and three circular icons (refresh, redo, undo) are visible. On the right side, a sidebar contains various parameters: Maximum length (256), Stop sequences (a text input field with a placeholder "Enter sequence and press Tab"), Top P (1), Frequency penalty (0), Presence penalty (0), and Best of (1). A tooltip is displayed in the center of the interface, stating: "Controls diversity via nucleus sampling: 0.5 means half of all likelihood-weighted options are considered." A purple callout box highlights the "Top P" parameter in the sidebar.

Frequency Penalty

The screenshot shows the OpenAI Playground interface. The main text input area contains the prompt "Write a tagline for an ice cream shop." Below the input area, a green "Submit" button and three circular icons (refresh, redo, undo) are visible. On the right side, a sidebar contains various parameters: Maximum length (256), Stop sequences (a text input field with a placeholder "Enter sequence and press Tab"), Top P (0.5), Frequency penalty (0), Presence penalty (0), and Best of (1). A tooltip is displayed in the center of the interface, stating: "How much to penalize new tokens based on their existing frequency in the text so far. Decreases the model's likelihood to repeat the same line verbatim." A purple callout box highlights the "Frequency penalty" parameter in the sidebar.
